

Company's Profile:

Founded in 1888, Nippon Oil has been a leading company in the Japanese oil Industry for more than a century.

Under the company's brand of "ENEOS", Nippon Oil is striving to establish an integrated oil business system from upstream to downstream, and is aiming to become a comprehensive energy company encompassing various related business such as petrochemicals, LPG, LNG, natural gas, coal, electricity and fuel cells in addition to the core petroleum business.

Nippon Oil Exploration Limited (NOEX) is an upstream wing of Nippon Oil Group of Companies, and its activities spread worldwide to countries such as Malaysia, Vietnam, Libya, USA, UK and other with production topping 150,000 BOED.

In Malaysia, NOEX started commercial production of natural gas from Helang Gas Field offshore Sarawak in 2003. Furthermore, NOEX acquired a new exploration block, SK-333 onshore Sarawak, in December 2007, and is actively exploring for oil discoveries. NOEX also participates in two blocks as a non-operator.
