

## **Shell Exploration & Production**

Shell Exploration & Production is one of the leading players in the search and recovery of oil and gas. Its activities spread to 48 countries around the world and provide work for almost 20,000 staff. E&P supports Shell's strategy of "more upstream, profitable downstream". This is reflected in our activities and operations around the world. In 2007, our daily oil and gas production was nearly 3.4 million barrels of oil equivalent (boe). Today, our technologies are making projects once considered impossible, possible. Across the industry, Shell-proprietary technologies have been setting standards and breaking records.
